Reference for Mr Mateusz Gąsior

I first met Mr Gąsior during his engineer cycle in the *Computer Programming* course. Then I was a supervisor of Mr Gąsior's engineer graduation project. Finally I instructed Mr Gąsior in the *Theory of Compilation* course.

Mr Gąsior was a motivated, inquisitive, eager to learn student. In his graduation project he proved his ability to clearly express ideas, analyse problems, and solve them. He is a communicative and broad-minded person, thinks logically and critically, asks mature questions. He can consider problems from various points of view and synthesise consistent solutions. Mr Gąsior is reliable and diligent, can organise his work, make plans and keep to them. He is not easily discouraged by problems. His high marks confirm his skills.

Mr Gąsior is a friendly person, gets well on with other students, can effectively work in a team.

In my opinion Mr Gąsior has proved to be a hard working, committed and inquisitive candidate for research and PhD studies.
